# Seminar-Workshop in Predictive Analytics 1 using IBM SPSS

## ABOUT THE COURSE

In this training you will consider in depth some of the more advanced statistical procedures that are available in SPSS. You'll take a look at several advanced statistical techniques and discuss situations when each may be used, the assumptions made by each method, how to set up the analysis using SPSS and how to interpret the results.

## WHO SHOULD ATTEND

- Anyone with little experience using IBM SPSS.
- Anyone who wants to do their own analysis, to save resources and maximize time.
- Those who are considering to purchase IBM SPSS.

## TRAINING INFO

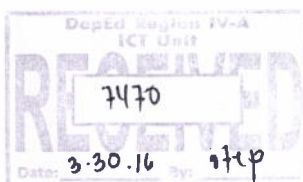

Training Date: **APRIL 14-15, 2016**  
 Training starts at exactly 9am  
 Venue: Adamson University

Limited seats are available,
