Chief, Education Program Supervisor

Dear Regional Director EscobarTE:

Greetings!

The Center for Health Development IV-A recognizes the implications of vision issues as they can contribute to learning problems, poor academic and athletic performance, developmental delays and behavioral concerns. Thus, early diagnosis and treatment of vision disorders can help support more normal visual development, prevent further loss of vision and help equip children with the tools needed to succeed. As we continue to support activities to strengthen partnerships with stakeholders to eliminate avoidable blindness in the Philippines, we would like to invite 25 school nurses in each province to attend the "Training of Primary Eye Care for School Nurses in CaLaBaRZon" this coming March 27-28 (Batch 1-Cavite) and March 29-30 (Batch 2-Batangas) at Leonidas Resort, Talisay, Batangas. This activity aims to:

- Train school nurses to screen, identify and refer children with eye health problems
- Establish a referral system for students with more complex eye health disorders that effectively links them with ophthalmic clinics and hospitals where further assessment and care can be provided
- Improve the knowledge of teachers, students, parents and community members about the importance of maintaining good vision for all family members

For queries and other related concerns you may contact *Dr. Carlos Jose M. Cofrelos* Blindness Prevention and Control Program Coordinator at 0906-3510-814, *Mr. John Nathaniel E. Reyes*, Nurse II at 0969-299-3439 or email us at noncom4a@gmail.com

We look forward to working with you.

Sincerely Yours,

ARIE I. VALENCIA, MD, MPH, CESO III
